

XINDA CLOVER

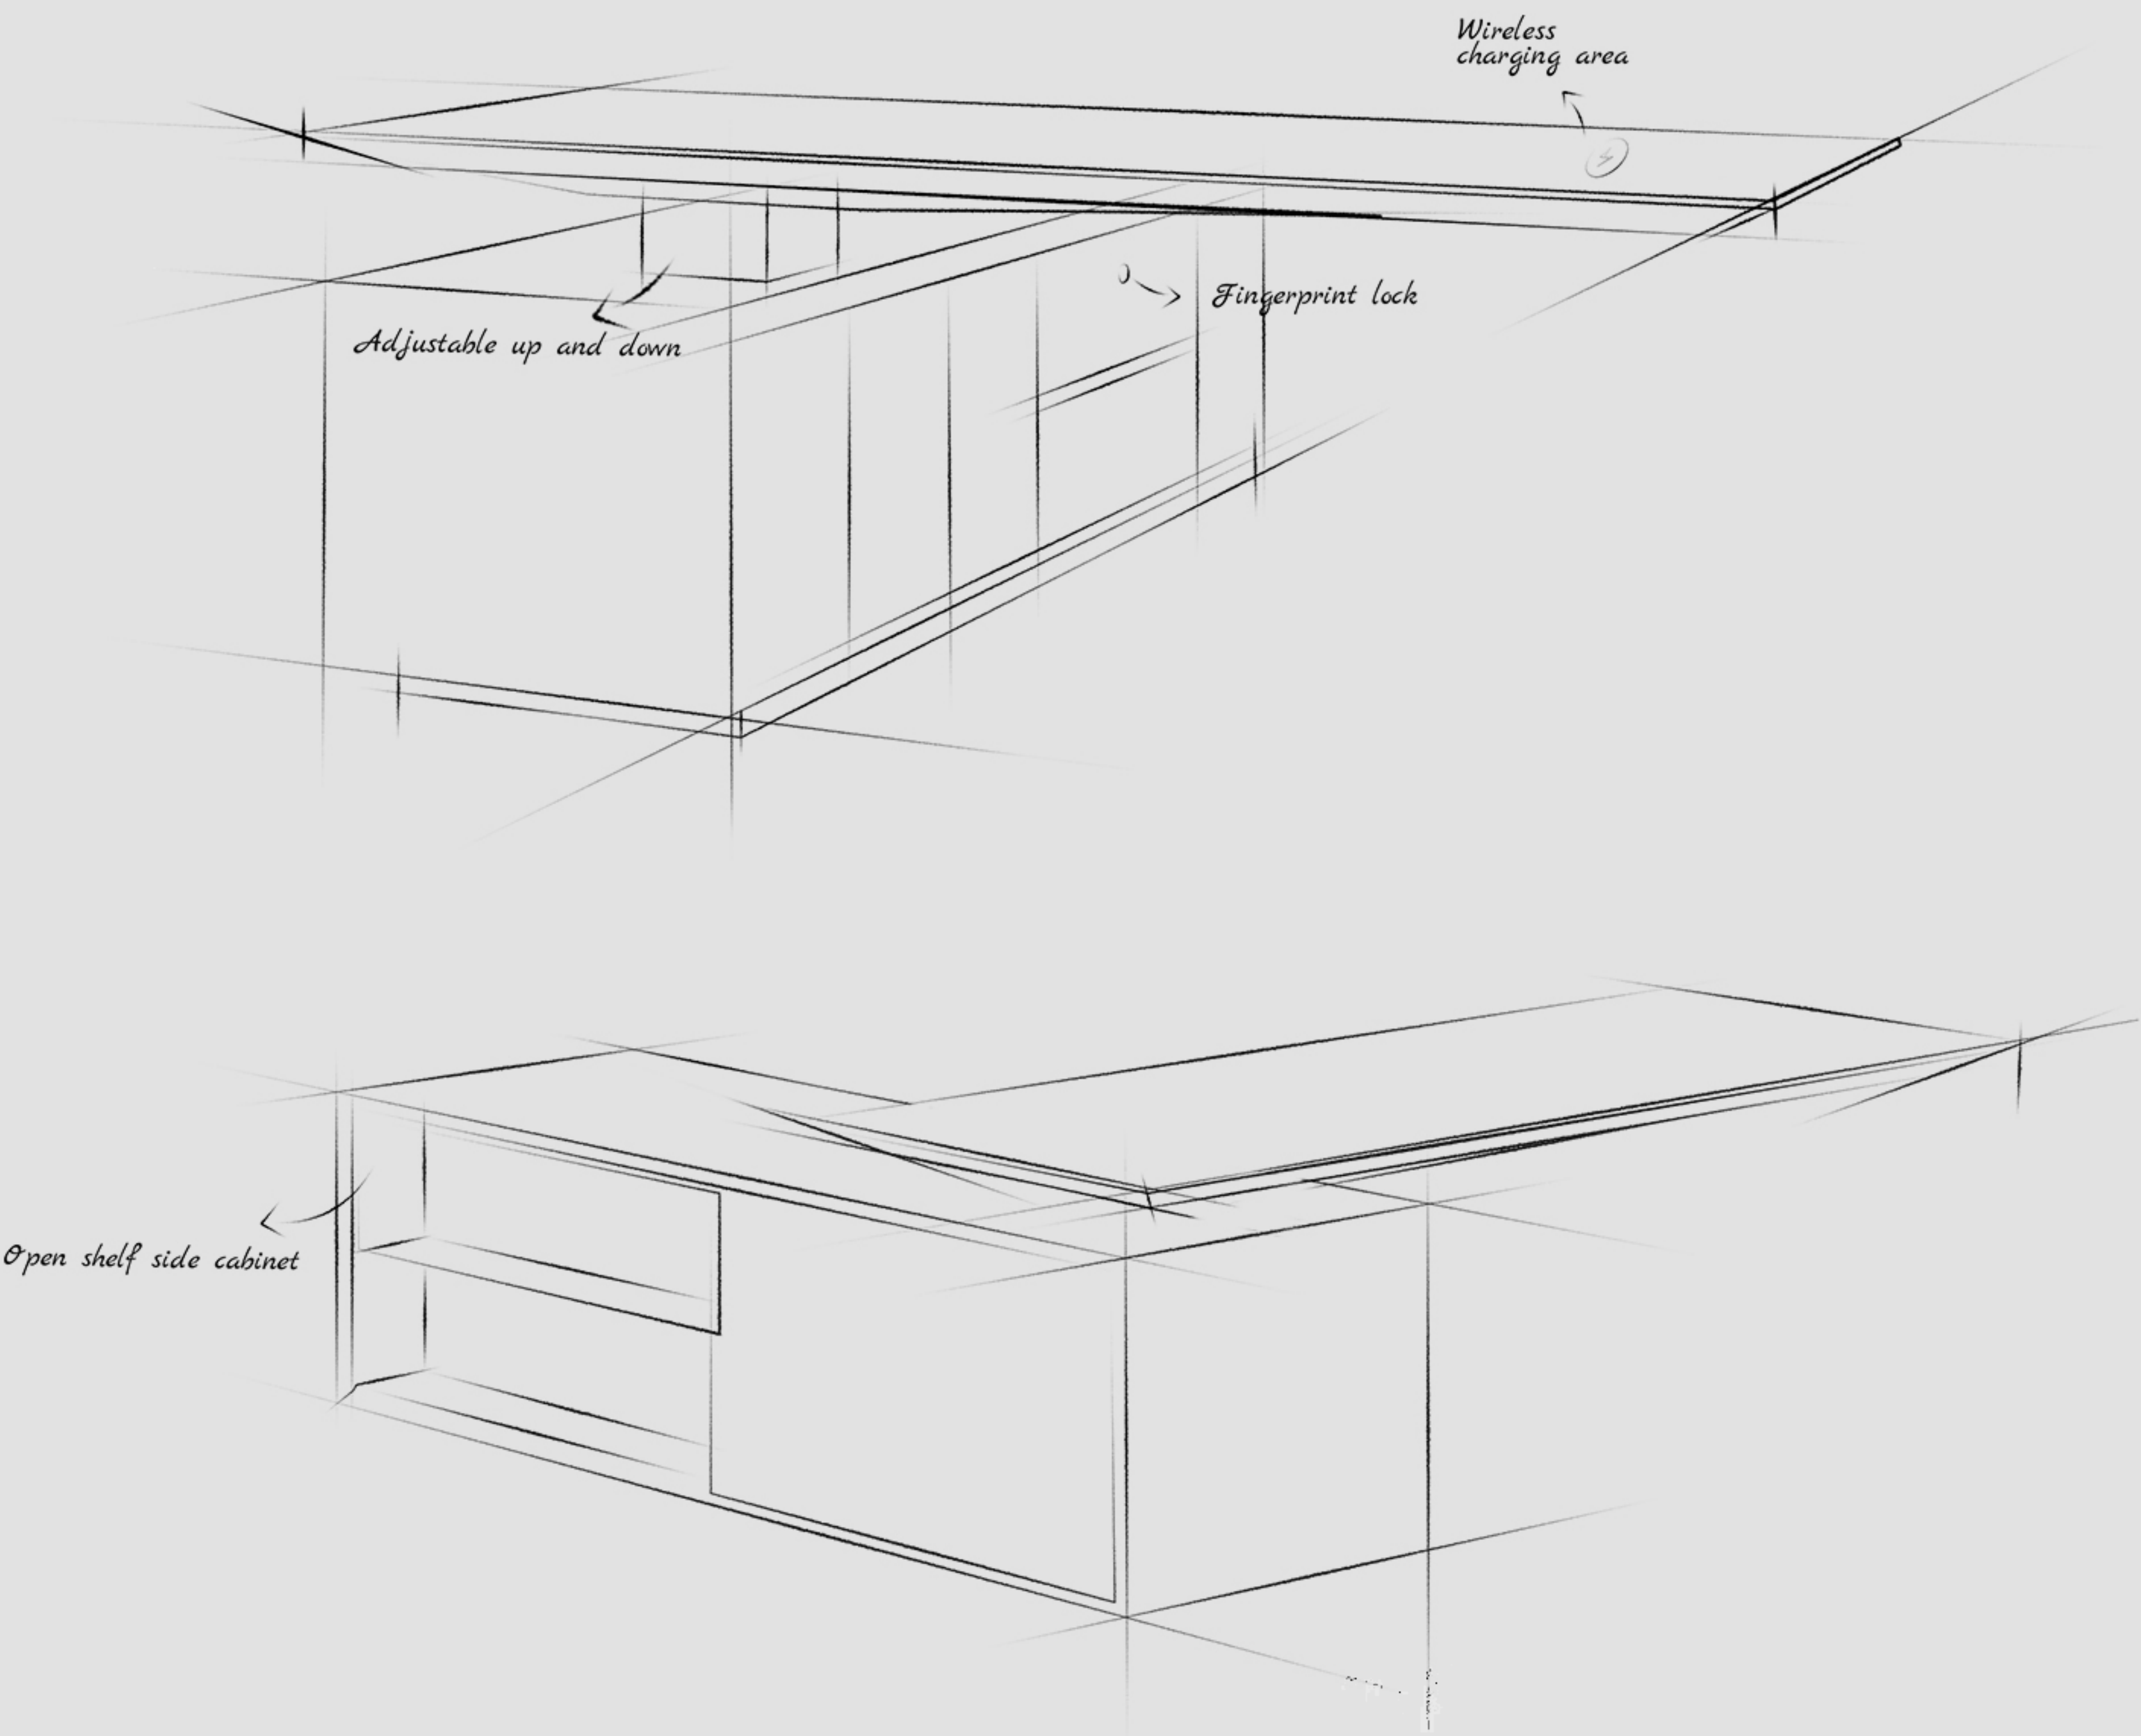

CARRIER

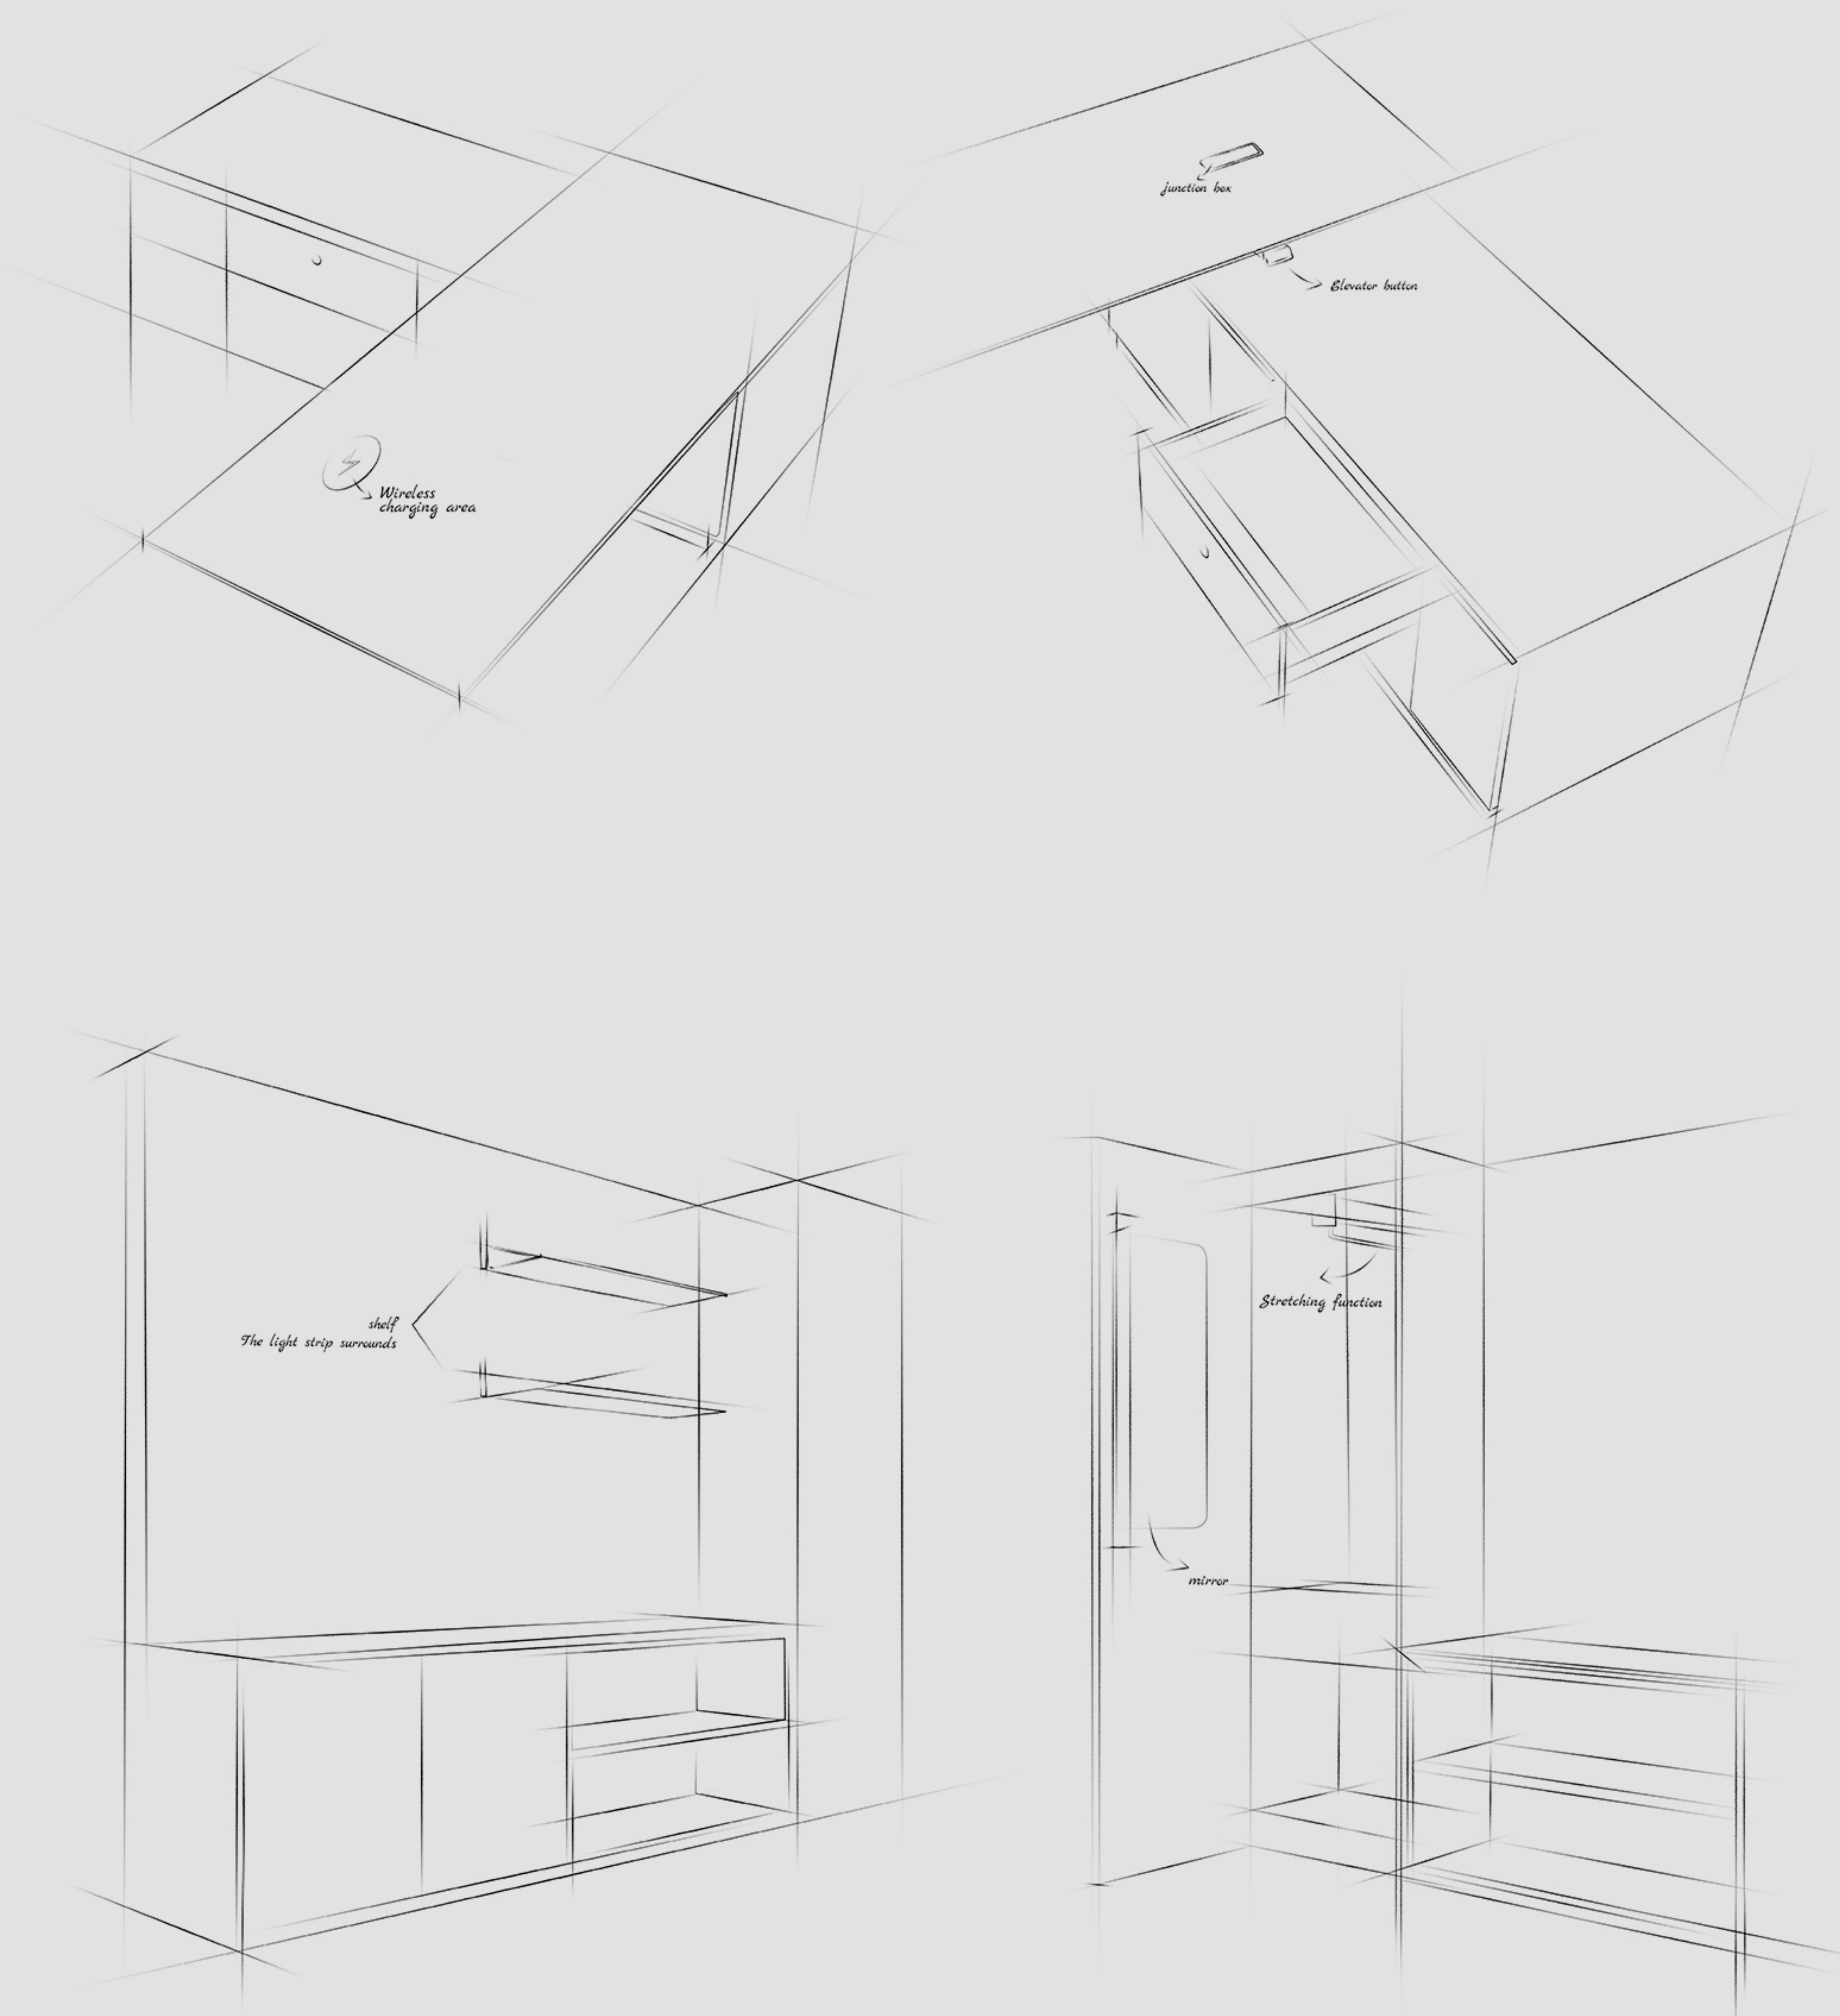

Carrier

The design inspiration of "Carrier" comes from the shape of an aircraft carrier. By this means, it expresses the exploratory spirit and leadership spirit of entrepreneurs. It adopts tough and powerful straight lines as the core to design its appearance, reflecting the powerful courage required of a ship's captain when sailing on the sea and symbolizing forging ahead without hesitation.

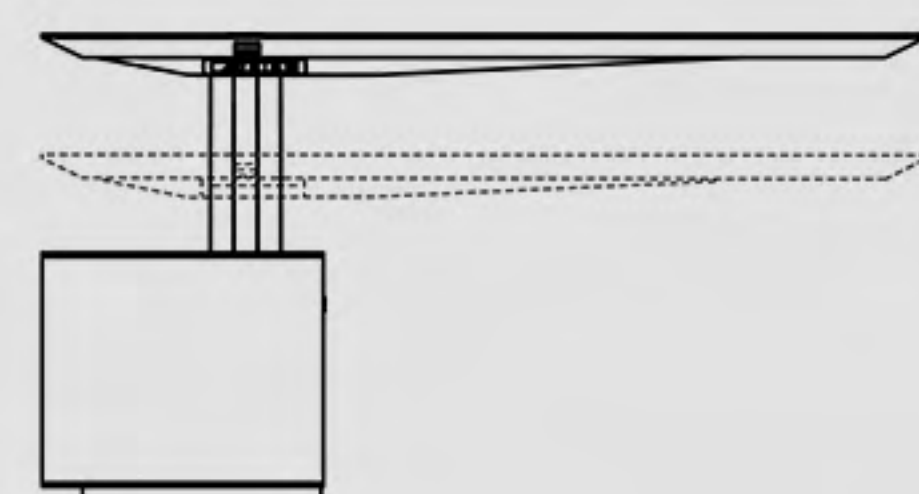

The overall product is developed around functionality, ergonomics, aesthetics, space utilization and visual balance, aiming to provide users with a healthy and comfortable office environment.
